The resounding and sustained success of Premier Group can clearly be attributed to the corporate core values that define our brand, company culture, business strategies, and way of working.

Since its inception in 1950, the Group has embarked on a course of success and played a vital role in the sugar, ethanol fuel, staple foods, packaging, bulk storage, construction, securities, and real estate businesses.

Every partner, stakeholder, and employee in the Group has made an astounding contribution to the success of every endeavor.

ABOUT US

The Group operates under the corporate umbrella of the Premier Group of Companies, a prominent name in commerce and industry since 1950. With extensive expertise in sugar production, ethanol, polypropylene products, state-of-the-art flour milling, bulk chemical handling, grain storage, and real estate, the Group is renowned for its excellence and commitment to growth in Pakistan's industrial landscape.

Dedicated to agricultural advancement, the Group has spearheaded initiatives to enhance sugarcane yields, introduce high-quality crop varieties, and support local wheat production in wheat-deficit provinces. In collaboration with the Provincial Government, it has established state-of-the-art silo storage facilities for efficient grain storage and handling.

Since its inception in 1950, the Group has developed nationwide ventures, supported by offices in Mardan, Lahore, Rawalpindi, Islamabad, and Karachi, making it one of the most respected conglomerates in the country. Its head office is located at 20-A, King's Arcade, F-7 Markaz, Islamabad.

VISION

To become a source of inspiration and innovation by setting international standards of excellence in production, corporate governance, food security, food processing, packaging, and agricultural advancement.

MISSION

01

Paving the way for the adoption of innovative and sustainable practices across the corporate and industrial landscape.

02

Achieving highest levels of productivity by providing safe and ideal working environment.

03

To address food security challenges and foster growth and sustainability in the food processing sector through innovation, integration, and agricultural advancement.

04

To revolutionize the food processing industry by continuously improving our quality management system, supply chain, and best practices, ensuring that excellence is woven into every step of our production process.

BOARD OF DIRECTORS

Begum Laila Sarfaraz

Chairperson

Begum Laila Haroon Sarfaraz has held the following positions;

- President All Pakistan Women's Association,
- Board Member Sindh Rural Support Organization,
- Member Technical Assistance Study Group, Asian Development Bank.
- Member National Council of Social Welfare.

Mr. Abbas Sarfaraz Khan

Group Chief Executive Officer

Mr. Abbas Sarfaraz Khan holds a Bachelor's degree in Economics from Boston University, USA, and has over 40 years of extensive experience in commerce and Industry where he has made significant contributions across diverse sectors, including sugar, ethanol, polypropylene, and food processing and has served as a Senator from 1997 to 1999 and also as a Federal Cabinet Minister during the periods of 1999-2002 and 2007-2008.

THE GROUP

AT A GLANCE

■ Premier Group Established in 1950

■ The Group is a multifaceted enterprise, recognized as the fourth-largest sugar producer and market leader in Polypropylene packaging in Pakistan. The group engages in various sectors, including:

Sugar Production: Specializes in white refined sugar from sugarcane.

Ethanol Production: Operating distilleries to produce ethanol.

Polypropylene Manufacturing: Collaborating with global experts to create high-grade polypropylene products.

Bulk Liquid Handling: Managing operations at a terminal in Karachi for bulk liquid products.

Real Estate: Engaging in various real estate ventures.

Agriculture Promotion: Supporting the cultivation of high-quality sugarcane varieties.

■ Employees: **5,000+** resources.

■ Total Turnover of Group: **Rs. 50+ Billion**

■ Total Assets Worth: **Rs. 100 + Billion**

Key Strategic Objectives

■ To grow our base business in sugar and build related activities where there is opportunity to smooth the impact of sugar price cycles.

■ To meet highest international production standards.

■ To make investments in agriculture to ensure food security and profitability of growers.

■ To offer equal and fair growth opportunities to all employees.

■ To undertake and support community development and welfare projects in order to fulfil social commitments.

GROUP COMPANIES

The Premier Group of Companies operates across six sectors, including the sugar and bio-fuel industry, food processing, packaging, bulk storage, real estate, and investment, encompassing a total of 12 different group companies.

The Premier Sugar Mills and Distillery Company Limited.

Frontier Sugar Mills and Distillery Limited.

Chashma Sugar Mills Limited

Ultimate Whole Foods (Pvt.) Limited.

Whole Foods (Pvt.) Limited.

Premier Grain Ethanol Limited.

Syntronics Limited

Syntron Limited

Azlak Enterprises (Pvt.) Limited.

ARPAK International Investments Limited.

Premier Construction and Housing Limited.

Premier Board Mills Limited

SUGAR DIVISION

The Premier Sugar Mills & Distillery Company Limited.

Mardan, KPK

The mill was commissioned in 1950 as the largest sugar factory in Asia, later complemented by the addition of a sugar beet plant to enhance sugar production. The plant has a crushing capacity of 4,000 metric tons per day. Recently, the company inaugurated a fully automated plant for jaggery production, with a capacity of 1,000 tons per day.

Frontier Sugar Mills and Distillery Limited.

Takht-e-Bhai, KPK

The mill was established in 1951 and was acquired by the Premier Group in 1987. It comprises a beet plant, a sugar cane crushing facility, and a distillery plant. The mill has a crushing capacity of 1,700 tons per day.

Chashma Sugar Mills Limited - Unit I

D.I.Khan KPK

The mills was set up in 1991 and so far helped growers to develop approx. 60,000 acres of land for the sugar cane supply by providing technical expertise and growing techniques. The rated crushing capacity of Unit-1 is 12,000 MT.

Chasma Sugar Mills Limited - Unit II

Ramak, D.I.Khan KPK

The mill was established in 2005 at Ramak, Dera Ismail Khan, KPK, with a crushing capacity of 6,000 metric tons per day. The Group has helped growers develop over 51,000 acres of land and provided technical assistance for the cultivation of high-yield cane varieties.

ETHANOL DIVISION

Chasma Ethanol Fuel Plant

Ramak, D.I, Khan, KPK

Chasma Ethanol plant is the epitome of ethanol production in Pakistan, with a capacity of 100 metric tons (125,000 liters) of ENA (Extra Neutral Alcohol) per day, using sugar cane molasses as feedstock. It produces the highest quality ethanol in its class. The plant operates with two state-of-the-art ENA plants, designed by M/s Interis SAS, France, with a combined total capacity of 152 metric tons (190,000 liters) of ENA per day with guaranteed minimum ethanol strength of 96.2% v/v.

CSM Distillery

Ethanol Storage Tanks

Premier Ethanol Fuel Plant

Ramak, D.I, Khan, KPK

Established in the 1960s with the production of rectified spirit, the facility has since been upgraded to produce 52 metric tons (65,000 liters) of ENA (Extra Neutral Alcohol) per day, using sugar cane molasses as feedstock.

PSM Distillery

Molasses Storage Tanks

FUTURE EXPANSIONS

Premier Grain Ethanol Limited

Punjab.

Premier Group has embarked on establishing Pakistan's first-ever grain-based distillery plant, named Premier Grain Ethanol Limited. The plant will have a production capacity of 240 metric tons (300,000 liters) per day of ENA, ENA Anhydrous, and Fuel Grade Ethanol. It will be a state-of-the-art facility based on European technology, using maize as the primary feedstock. The plant's commercial operations are planned to commence by 2026-2027.

Ethanol from maize has significant carbon-neutral potential: the carbon released during the combustion of ethanol or the use of DDGS (Dried Distillers Grains with Solubles) is offset by the carbon absorbed during maize growth. This gives maize-based ethanol a much lower environmental impact compared to fossil fuels. Furthermore, maize-based ethanol integrates seamlessly with gasoline, allowing it to be easily incorporated into existing fuel systems without the need for extensive modifications. These characteristics make maize an effective resource for ethanol production, contributing to both ecological sustainability and energy resilience.

Ultimate

WHOLE FOODS

Ultimate Whole Foods (Private) Limited is a leading flour milling company located in the heart of Khyber Pakhtunkhwa. Established in 2023 as a subsidiary of Chashma Sugar Mills Limited, we are equipped with state-of-the-art Buhler machinery, a globally recognized Swiss technology and integrated with the high-compression PesaMill™ that enables us to process up to 285 tons of wheat flour per day. Our facility in Ramak, Dera Ismail Khan, operates with 12 Roller Body Flour Mills with a capacity of 270 TPD, setting a new benchmark for milling technology in Pakistan.

- The flagship B2B brand
- Caters to various B2B needs with its wide range of flour
- Ideal for large-scale production
- Operating across 77 stations

- A leading consumer brand by Ultimate Whole Foods
- Offers premium Chakki Atta
- Product range soon expanding to include White Chakki and Fine Atta
- Available in KPK, Islamabad and Rawalpindi
- Expanding to Central and Southern regions

- Premium B2B brand currently under development
- Set to launch in Q4 2024
- Will expand the group's presence in the KPK region
- Catering to businesses seeking superior flour solutions

TOP-TIER MILLING TECHNOLOGY

Our commitment to quality is exemplified through our investment in cutting-edge milling technology. Buhler's CombiMill process, integrated with the high-compression PesaMill™, offers unparalleled flexibility in the production of various flour qualities. This unique technology allows us to produce whole wheat flour for traditional flatbread, dark flour, and standard bakery flour—all while adhering to the highest standards of food safety and efficiency.

OUR SPECIALTY

At Ultimate Whole Foods, we specialize in producing an array of high-quality wheat flour products, including various categories of Atta, Maida (soft and hard), Suji, Fine (danedar & superfine), and Bran (fine & coarse). We maintain stringent quality control through every stage of production, from procurement to packaging. Our advanced Buhler machinery ensures precise consistency in every product we manufacture.

QUALITY AND SUPPLY CHAIN EXCELLENCE

Our supply chain management systems are designed to ensure the finest quality at every stage of production. We use state-of-the-art lab equipment and stringent quality parameters for grain procurement and processing. This meticulous approach allows us to meet the most demanding standards of our corporate clients across various industries, ensuring that every batch meets our high-quality benchmarks.

PACKAGING DIVISION

Syntronics Limited is one of the largest manufacturers of AD*STAR® polypropylene laminated block-bottomed valve sacks in the world, primarily used for packaging cement. The facility was established in 1999 at Hattar, Pakistan, with an annual capacity of 60 million sacks. It currently operates three units, with a total annual production capacity of over 200 million sacks.

As part of our company policy and vision to provide comprehensive packaging solutions to various industries in Pakistan, Syntronics has expanded its manufacturing processes by adding gravure printing and BOPP lamination machines. We have also incorporated extrusion coating for gravure-printed, laminated, stitched PP woven bags, along with horizontal and vertical gusseting machines. This enables us to offer a wide range of normal and twist/displaced gussets on PP woven laminated stitched bags. All our processes are Hilal Certified. Additionally, we manufacture high-quality flexible packaging solutions, including wrappers for various biscuit packing SKUs and snack packs.

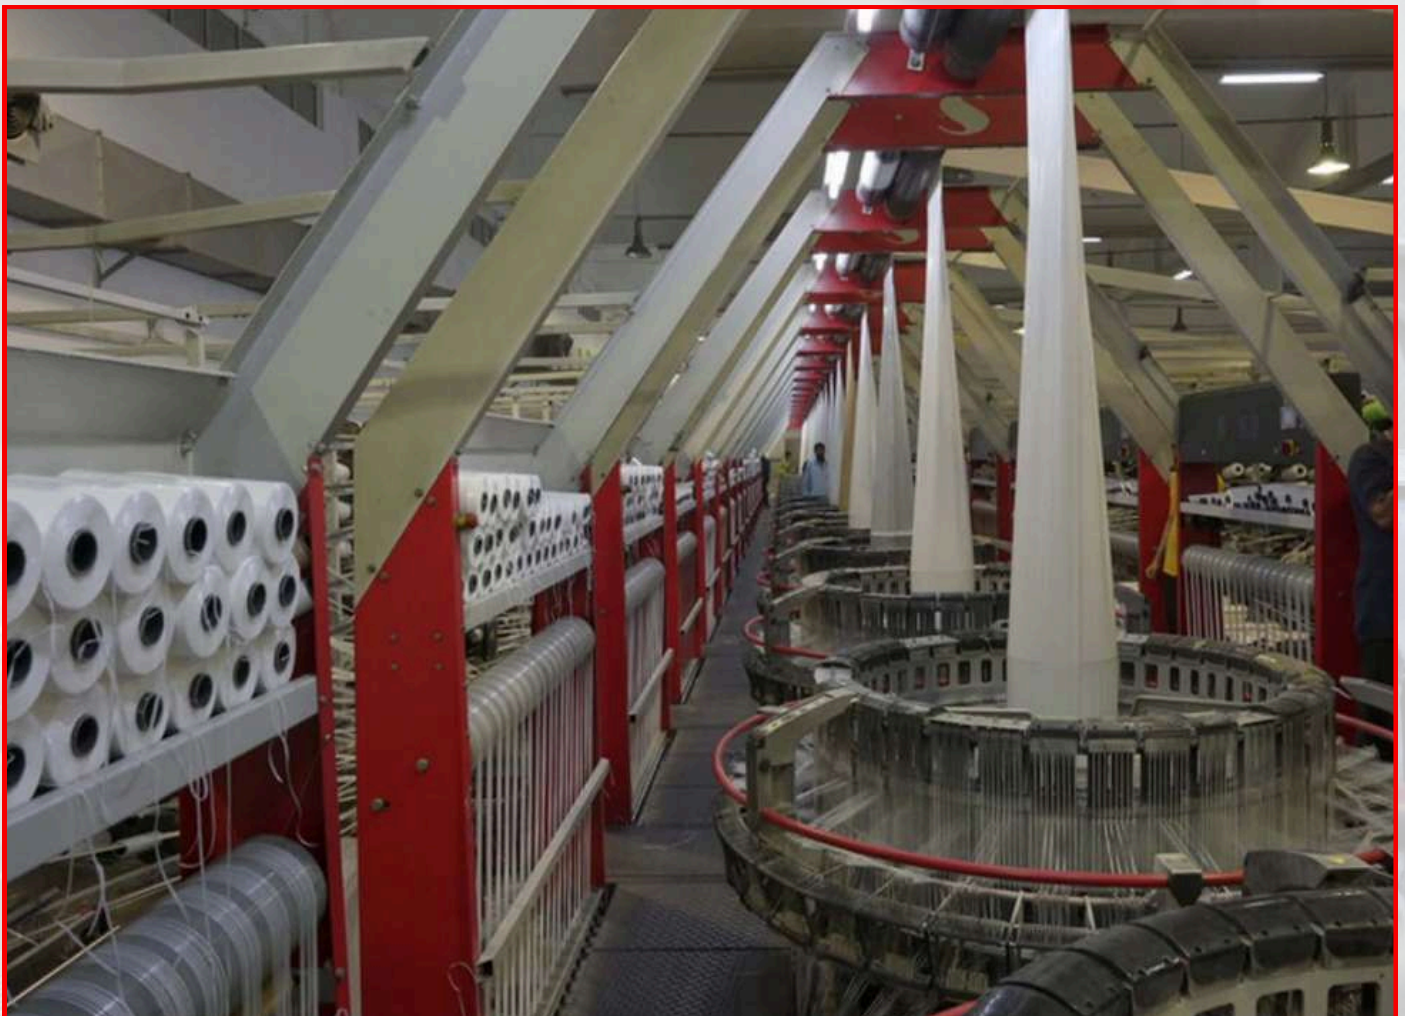

PACKAGING DIVISION

Syntron Limited

Industrial Estate, Gadoon Amazai, Swabi, KPK

Syntron Limited operates from the Gadoon Amazai Industrial Estate and produces high-quality, open-mouth, stitched food-grade sacks. Established in 2011, Syntron Ltd. complements the production of Syntronics Limited and caters to the rapidly growing market demand for woven polypropylene bags. With a production capacity of 200,000 bags per day, Syntron Ltd. utilizes state-of-the-art equipment powered by Starlinger, ensuring unmatched quality compared to competitors.

BULK STORAGE

Azlak Enterprises (Pvt) Ltd.

Karachi

With 55 years of operational experience, this company is a leader in the handling of bulk chemicals in Pakistan. Based at the Karachi Port, it operates a chemical terminal with ample storage facilities designed for specialized chemicals.

Whole Foods (Pvt) Ltd.

Bhakkar and Layyah, Punjab

Whole Foods (Pvt.) Limited has entered into a build, operate, and own model. We have signed a concession agreement with the Government of Punjab and implemented wheat silo facilities near wheat farms, with a total storage capacity of 20,000 MT.

OTHER BUSINESSES

Arpak International Investment Limited

Islamabad, Pakistan

Arpak International Investment Limited is a listed Company with interests in real estate and equities, and operating as general investment company

Premier Construction and Housing Limited

Lalamusa, Punjab, Pakistan

Premier Construction And Housing Limited (Formerly Premier Ceramics Limited) (Public Ltd Company -Non Listed) is located along side of G.T. Road, Lalamusa, Punjab.

Premier Board Mills Limited

Mardan KPK

The company is exploring the possibilities of setting up a medium density fiberboard project. This project is at initial stage.
